

ESHWAR KUMAR KOUJU

+91-9553020778 | eshwarkumar7755@gmail.com | Bengaluru, Karnataka
LinkedIn: linkedin.com/in/eshwar-kumar-kouju-a239b936a | GitHub: github.com/iamEshwarKumar

TECHNICAL SKILLS

Languages & Analytics: SQL (Advanced), Python (Pandas, NumPy, Scikit-learn), Statistical Analysis, Machine Learning

Visualization & BI: Tableau, Power BI, Excel (Advanced Pivot Tables, VLOOKUP, Macros)

Data Engineering: ETL Pipelines, Data Cleaning, Feature Engineering, MySQL, PostgreSQL

Web Technologies: HTML, CSS, JavaScript

Core Competencies: Predictive Modeling, Customer Analytics, Churn Analysis, Fraud Detection, KPI Development, A/B Testing, Business Intelligence, Stakeholder Communication

PROJECTS

Delivery Operations Analytics | E-Commerce Platform Analysis

Python, SQL, Tableau | 100K+ order records

- Reduced refund rate 15-20% by identifying 35% refund correlation with 60+ min delays vs 8% on-time baseline
- Cut data prep time 80% via automated ETL pipeline processing 13 variables for weekly performance tracking
- Surfaced cost driver: Electronics category showed 22% higher delay rates through sentiment analysis of 68% negative reviews
- Built executive dashboard tracking delivery KPIs across 3 platforms and multiple product categories

Insurance Fraud Detection | Claims Risk Assessment

Python, SQL, Power BI | 1,000 claims, 40 variables

- Identified ₹18K fraud signal: Fraudulent claims averaged ₹83K vs ₹65K legitimate (28% premium)
- Quantified verification ROI: Claims with police reports showed 60% higher legitimacy rates
- Engineered fraud risk framework analyzing incident patterns, witness presence, and claim severity
- Designed Power BI dashboard enabling risk-based claim prioritization for underwriting teams

Customer Retention Strategy | Telecom Churn Analysis

Python, SQL, Excel | 7,043 customer records

- Uncovered ₹16M revenue leak: Mapped churn patterns showing 55% loss from fiber optic segment
- Found ₹2.5M upsell opportunity: 35% higher churn among customers lacking security/support bundles
- Proved contract value: Month-to-month plans churned at 42% vs 3% two-year contracts (14x difference)
- Automated monthly reporting in Excel, reducing analysis cycle from 8 hours to 90 minutes

EDUCATION

B.Tech, Electronics and Communication Engineering | MLR Institute of Technology, Hyderabad | 2021-2025 |

CGPA: 7.23/10.0

CERTIFICATIONS

- Data Analysis Professional Certificate – WhiteScholars Academy (2025)
- Data Analysis Simulation – Deloitte (2025)

ADDITIONAL INFORMATION

- Portfolio of 8+ end-to-end data analysis projects covering e-commerce, insurance, telecom, and sports analytics on GitHub, demonstrating adaptability across diverse business domains.
- Experience working with diverse datasets (1K - 100K+ records) across multiple industries, showcasing versatility and quick learning ability
- Proficient in creating technical documentation and presenting data-driven insights, demonstrating strong written and verbal communication skill
